Respondent Demographics

- 5,144 respondents, with a slightly higher proportion of respondents of working ages

Age Breakdown

Geographical Breakdown

- Broad geographic spread of responses, 36% of respondents started their journey from a Cambridge postcode

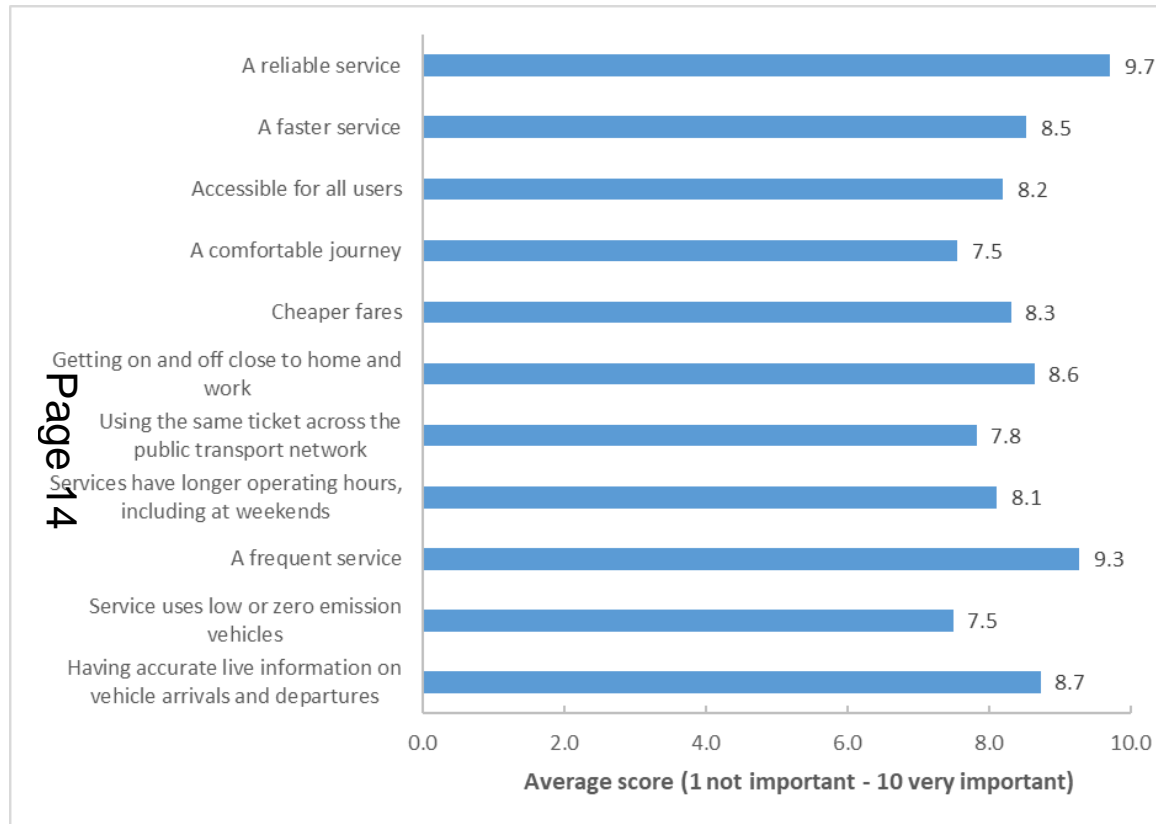

Respondents Travel

- Nearly three quarters of respondents (73%) were travelling to work as their primary journey.
- Over half (51%) were traveling by car and just under a quarter (24%) were travelling by bicycle.

Main mode of travel

Importance of public transport network elements

- The elements of a transformed public transport network which were most important to respondents were **a reliable and frequent service.**

Support for the GCP Vision

- 82% of respondents supported* the vision to significantly improve public transport

* Very supportive plus supportive

Variation in support for different groups

Public transport improvement funding ideas

Of those that answered:

(287 respondents skipped the ranking)

- 81% chose one of the options as a first choice.
- A **pollution charge** and **flexible charging** for road use were the most popular funding ideas being ranked as either **first or second** choice by **44%** and **36%** of respondents respectively.
- 19% chose other ideas** as their first choice. These included **boosting usage** (and consequently revenue) by **improving public transport** (including Park & Ride provision) or **utilising existing taxation streams**.

Key messages from the comments

Respondents consistently felt improvements needed to be made to public transport so that people had a **viable alternative to driving**.

If **parking charges** or a **flexible/pollution based charge** were introduced:

- money raised should be used to improve transport across the area
- it should be cheaper to travel into Cambridge by public transport than to drive in and park.

Other key themes which emerged included:

- concerns relating to how the potential changes impact businesses, and those with low incomes and/or disabilities
- the need for improvements to cycling infrastructure
- concerns about the workplace parking levy and business relocation
- concerns about pollution charges not reducing congestion (in the long term) due to the rise in greener vehicles

Citizen's Assembly

- Greater Cambridge Partnership is one of three successful local bodies to have won funding from Government as part of the Innovation in Democracy programme
- £60,000 of funding to run a deliberative democratic process: Citizens' Assemblies
- Two independent organisations are delivering the Assembly:
 - The **Sortition Foundation** is responsible for recruiting people to take part in the Assembly; ensuring it is broadly representative of the community.
 - The **Involve Foundation** is a UK-wide public participation charity. Involve will run the Citizens' Assembly - facilitating and designing the process by which the Assembly members learn, consider and come to recommendations about the topic.

The Question

How do we reduce congestion, improve air quality, and provide better public transport in Greater Cambridge?

Page 21

Greater Cambridge Citizens' Assembly

GREATER
CAMBRIDGE
PARTNERSHIP

How else can people take part / keep informed?

- Using Consult Cambs as portal for information –before, during & after
- Asking for views on what issues the Assembly should consider
- Asking for “travel stories” to reflect wider views
- Some might be asked to present evidence
- Observer places available
- Live stream of presentations

Greater Cambridge Citizens' Assembly

How do we reduce congestion, improve air quality, and provide better public transport in Greater Cambridge?

To help us answer this question, a group of residents will come together for four days at the Greater Cambridge Citizens' Assembly and help solve this key issue for the area.

The Greater Cambridge Citizens' Assembly will take place on the following dates in Cambridge:

- Saturday 7 and Sunday 8 September 2019
- Saturday 5 and Sunday 6 October 2019

A Citizens' Assembly for Greater Cambridge

In a Citizens' Assembly, members of the public are brought together to consider a public issue and make a recommendation on what action should be taken on that issue.

They do this by listening to evidence, discussing the evidence they hear, and reaching a conclusion together on what steps the government should take next. The Assembly's recommendation is then given to decision makers in government who decide what will happen next.

Member of the Citizens' Assembly will hear evidence, work with other participants and come up with
