Planning Balance

Approval

Material considerations

- Significant economic public benefits by addressing shortage/ demand for life science development, locally and nationally. Net increase of 1,868 jobs. Improved retail environment for retained retail.
- Improvements to visitor economy through 120 bedroom hotel.
- Moderate social public benefits through community classroom, educational outreach and incubator/ grown-on floorspace.
- Significant environmental benefits through facilitation of S278 Highway improvements to East Road, Enhanced public realm on Fitzroy Lane and northern route and financial contribution of £600,000 towards Burleigh Street public realm improvements. Re-use of previously developed (brownfield) land, lower embodied carbon, significant (439%) BNG and high standard of building sustainability.
- No objections from technical consultees.

Refusal

Material considerations

- Moderate level of less than substantial harm to setting of Central Conservation Area and Grade I Listed Jesus College Chapel.
- Environmental Harm in terms of the estimated increased operational demand on water supply of 6,380 l/day. From a water resource planning perspective, this equates to 0.006 MI/d across the Cambridge Water Resource Zone.
- Minor conflict with Policy 3 of the Local Plan through the loss of the two flats on Burleigh Street.
- Temporary harm in terms of associated construction impacts
