Planning Committee

GREATER CAMBRIDGE
SHARED PLANNING

Agenda Item 9

MAJOR APPLICATIONS

23/04686/FUL

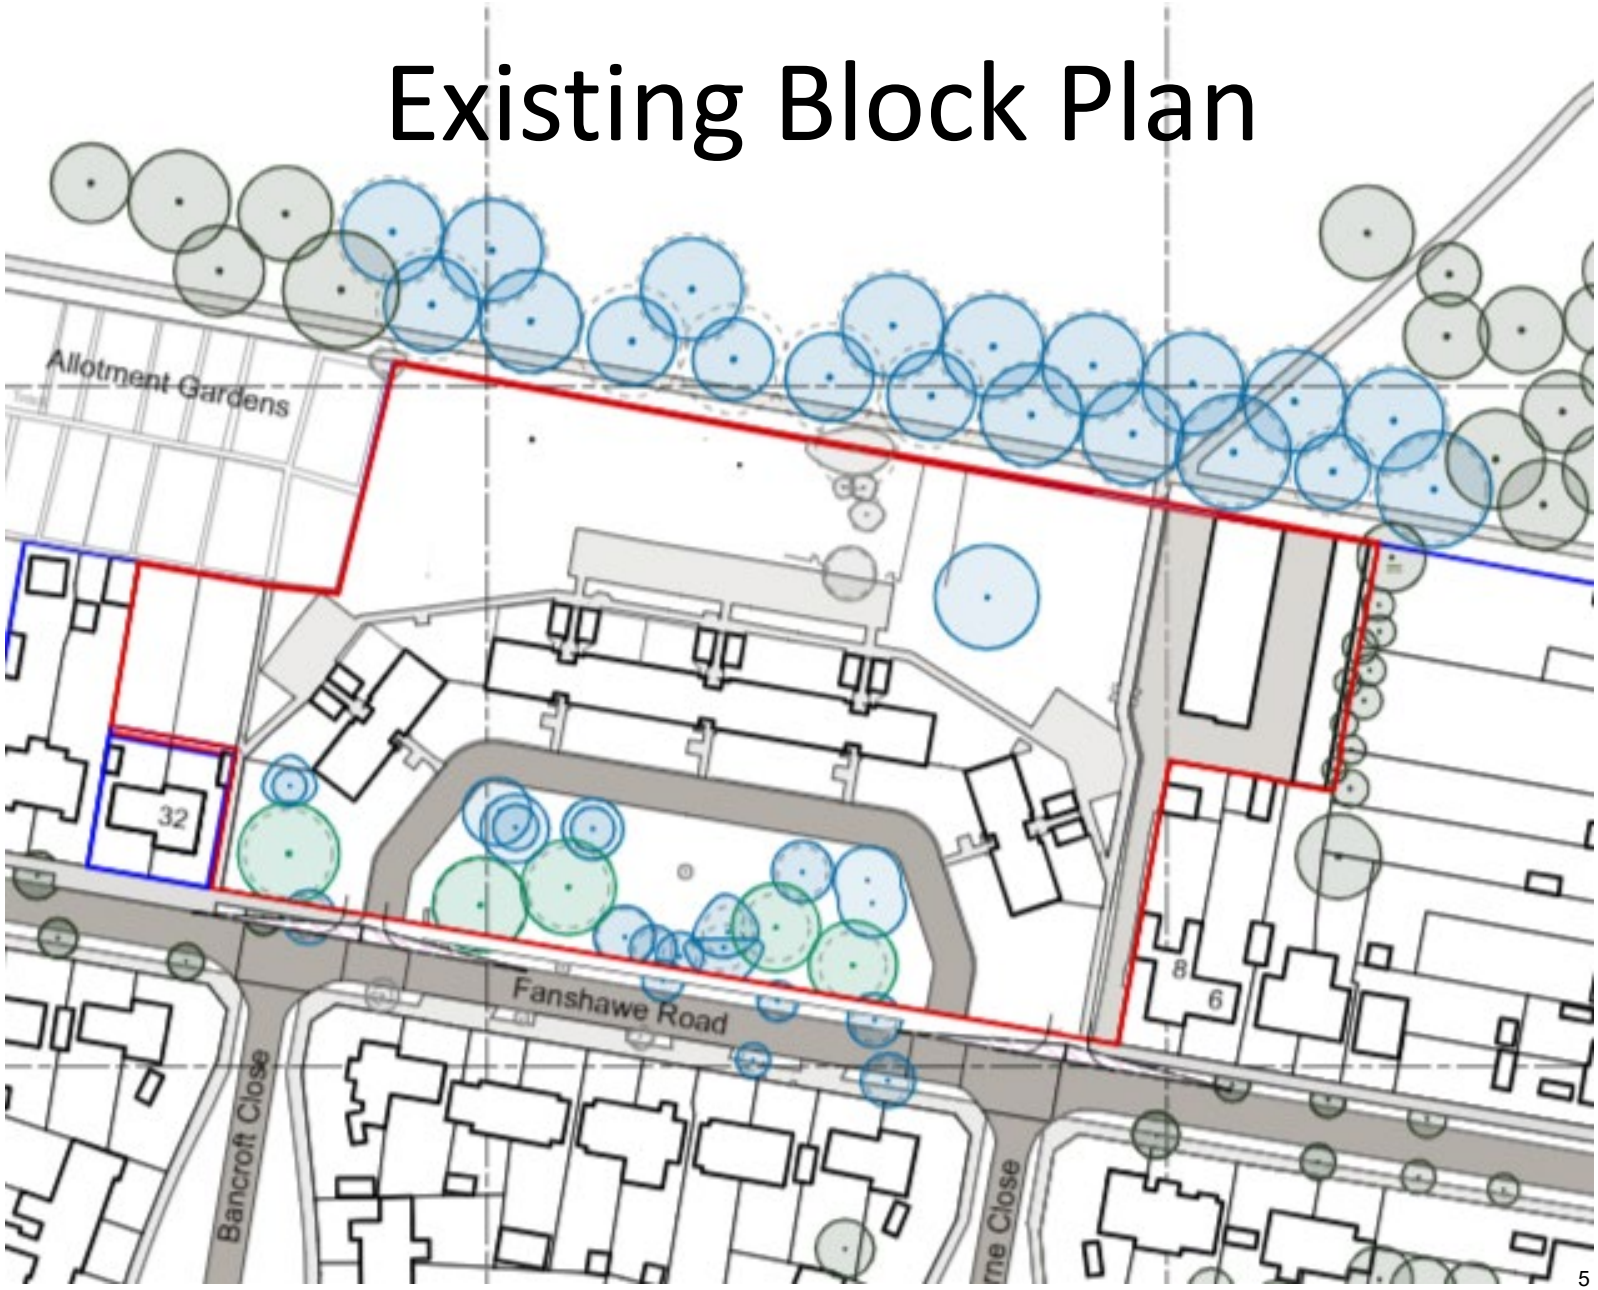
Demolition of the existing buildings, garages and hardstanding and the erection of 84 residential units, car parking, landscaping and associated works

12 – 34 Fanshawe Road

Existing Site

- Coleridge Recreation Ground
- Allotments
- Communal Gardens and Protected open Space
- Access to Recreation ground
- Hard-standing washing drying area
- Existing Garages on Site
- Existing 3 Storey apartments
- Sub station
- Protected Open Space

Existing Block Plan



Site & Context

2.5 Existing Buildings

The existing 30 apartments have been determined to no longer meet the requirements of the residents, fall below current space standards, have very low thermal efficiency, and are in poor condition, with structural issues.

The site also contains low-quality and under-utilised green spaces and parking areas, and garages.

1. Existing 3 storey flats on site

2. Existing garages on site

3. Existing Sub Station on perimeter of site

4. View of site from the centre of Coleridge Park

5. View from Bancroft Close

6. Looking west down Fanshawe Road

7. Looking east down Fanshawe Road

8. View from Coleridge Recreation Ground

Protected Open Space

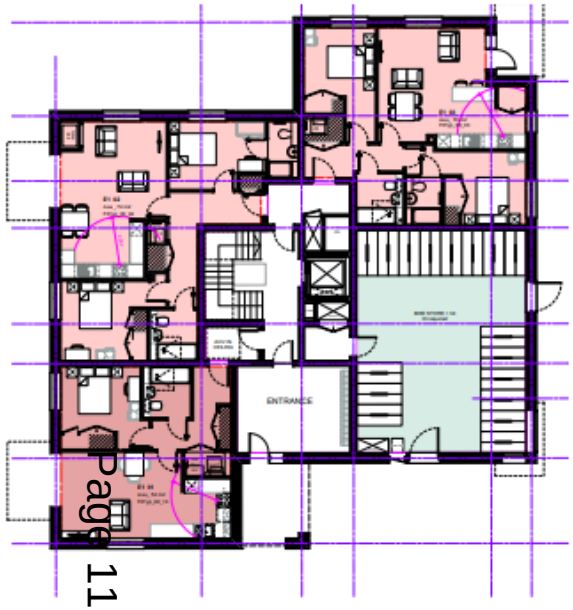
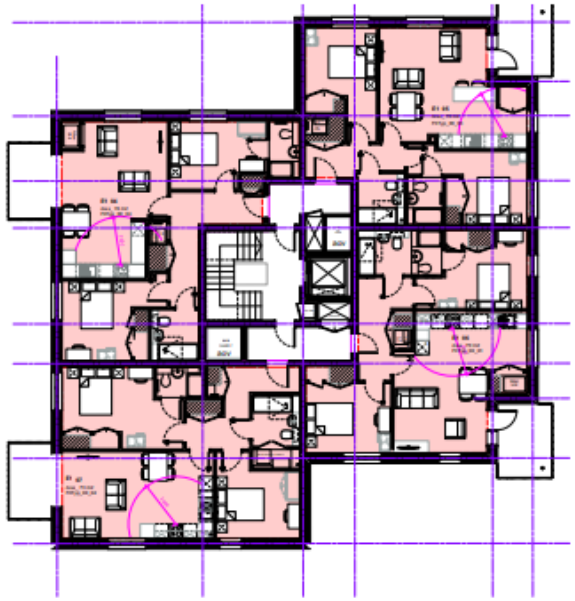
Design Proposal

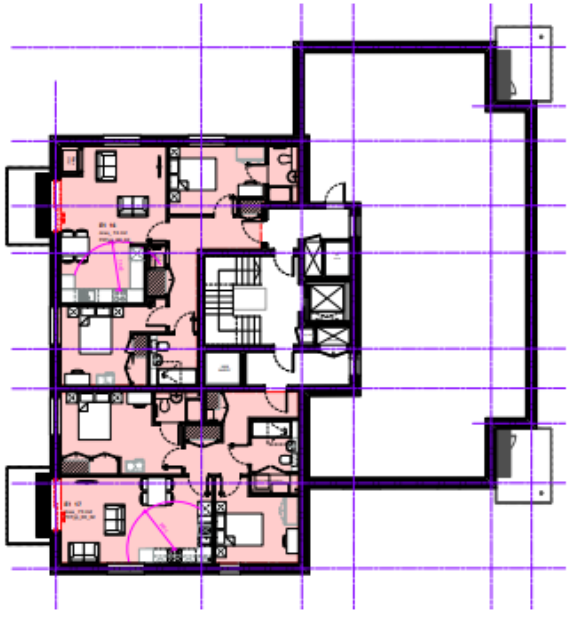
4.5 Form and Scale : E1



E1 Ground Floor Plan



E1 1st - 3rd Floor Plan



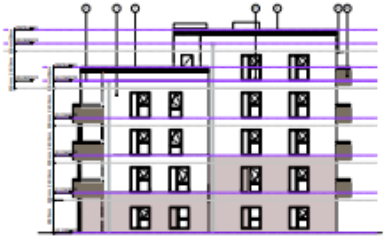
E1 4th Floor Plan

1B/2P Apartment

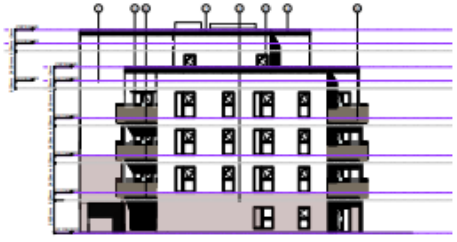
Bike store

2B/4P Apartment

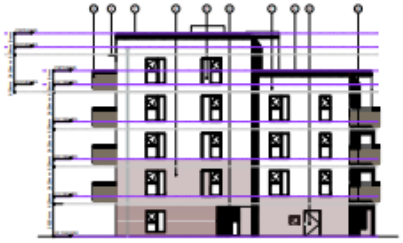
E1's entrance is recessed into the elevation and denoted by a glazed brick recess. The building has two recessed corner balconies to the east elevation to break up the scale of the building as perceived from the new E3 terraced houses. The building steps in height, going from four to five storeys. the five storey elements face the new park side. The height in the building steps with the step in plan.



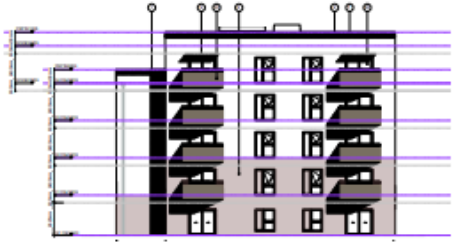
North Elevation



East Elevation



South Elevation

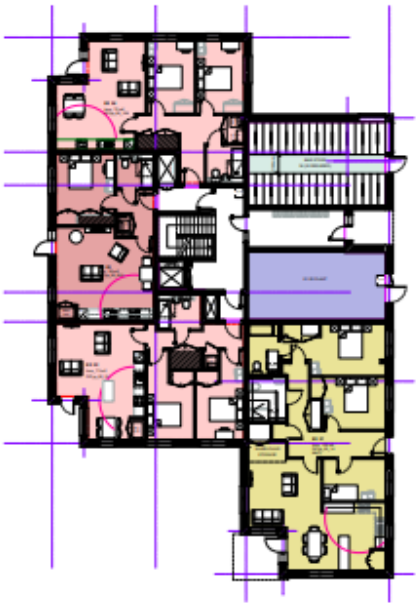


West Elevation

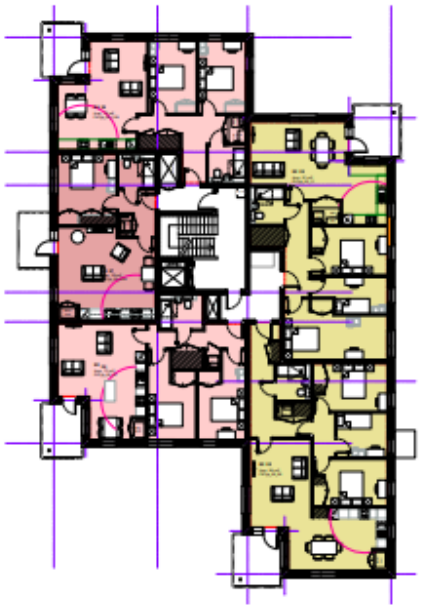
Design Proposal

4.5 Form and Scale : E2

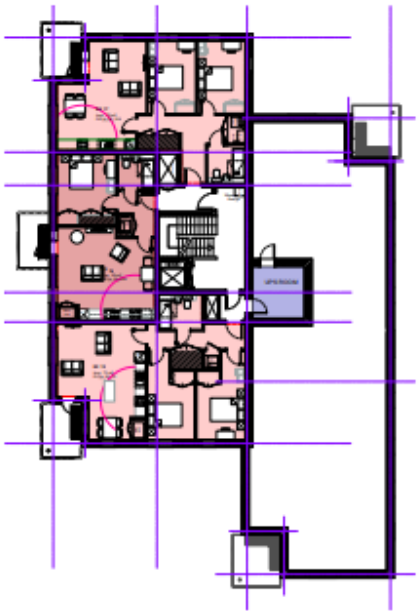
E2's entrance is recessed into the east elevation to activate the new street. The building is three and four storey in height. The building has four recessed corner balconies. The building steps in height to reduce the perceived mass of the building. The building has a four storey elevation to the new green space and three stories on the east side to provide a sensitive scale elevation to the adjacent existing houses.



E2 Ground Floor Plan



E2 1st - 2nd Floor Plan



E2 3rd Floor Plan

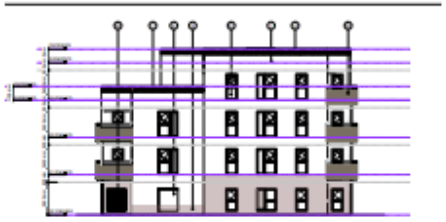
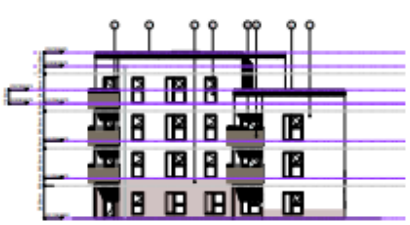
2B/4P Apartment
3B/5P Apartment
Bike store
Plant

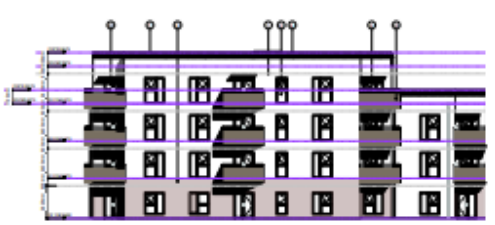


North Elevation

East Elevation



South Elevation



West Elevation

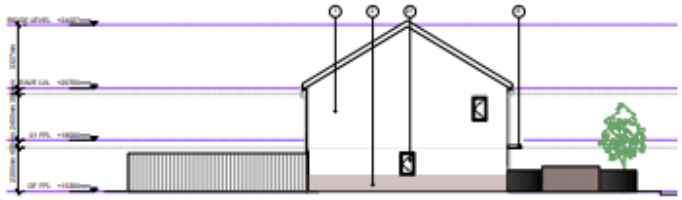
Design Proposal

4.5 Form and Scale : E3

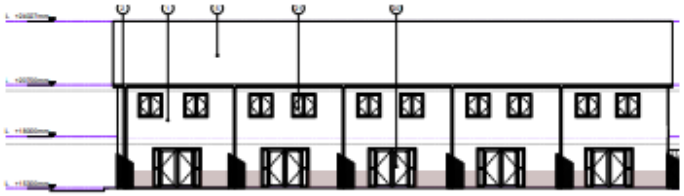
E3 is a row of five terrace homes. The west elevation provides passive overlooking of the recreation ground path. The homes are clad in white brick with a brown brick base. Brown brick banding around entrances denotes the main entrance and adds interest to the elevation. Window and door frames are in a matching red shade.

Bin stores are in timber clad strucutres to the front of the houses and provide space for covered cycle parking and a green bin. They also provide a location for the EV charging points on the side of the garden store.

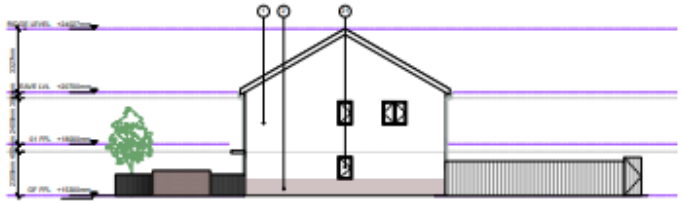
3B/5P House



South Elevation

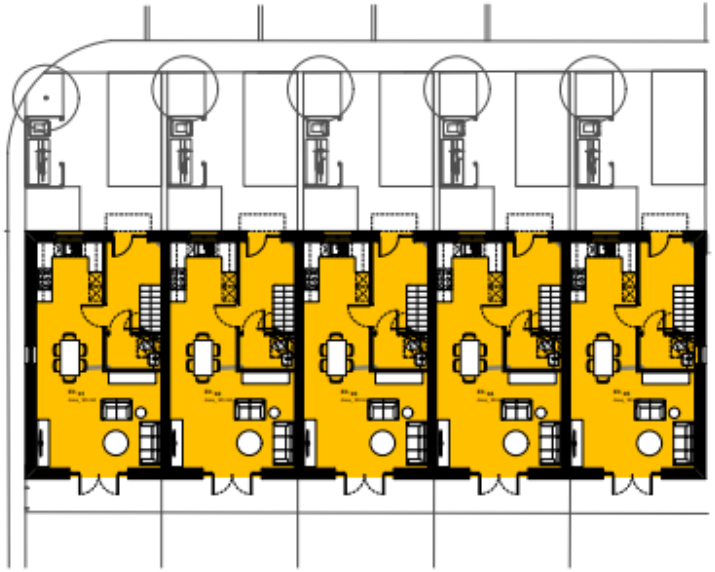


East Elevation

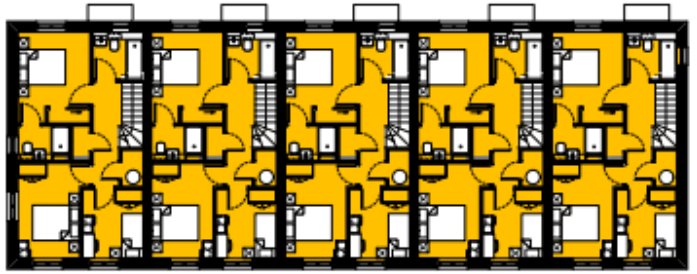


North Elevation

West Elevation



E3 Ground Floor Plan



E3 First Floor Plan

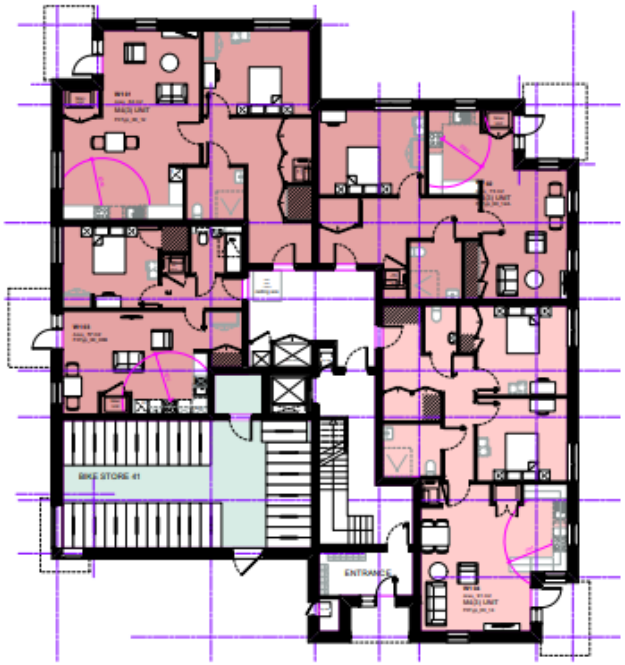
Design Proposal

4.5 Form and Scale : W1

W1 entrance is recessed into the elevation and denoted by glazed brick recess. The building has recessed corner balconies , with the brick walls and balcony finishes all matching and contrasting in red to the main body of the building. A vertical change in the brick colour to the main body of the building creates visual interest and creates a visual break in the height of the building.

Unsupported cantilevered balconies are in a finish matching the corner balconies to create a consistent visual contrast to the main body of the building.

This approach to the external materials is consistent on all four apartment buildings to create a cohesive strategy across the scheme and create a tenure blind scheme.



W1 Ground Floor Plan

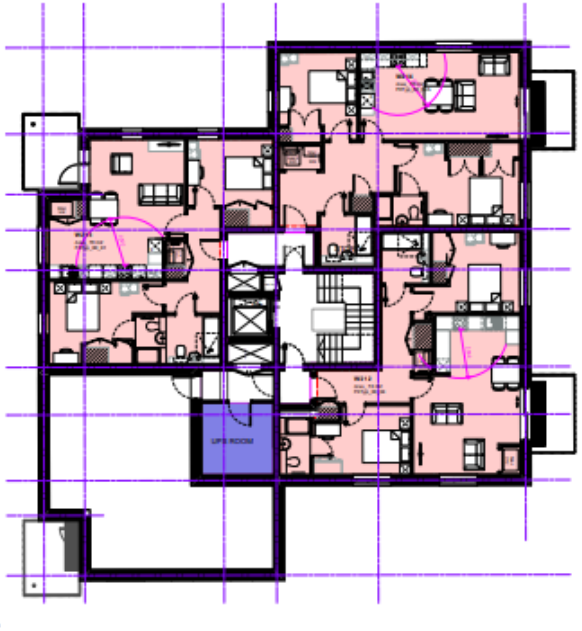
W2 1st - 2nd Floor Plan



W2 3rd Floor Plan

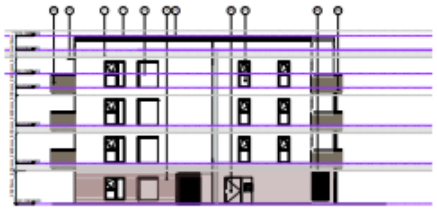
1B/2P Apartment

2B/4P Apartment

Bike store

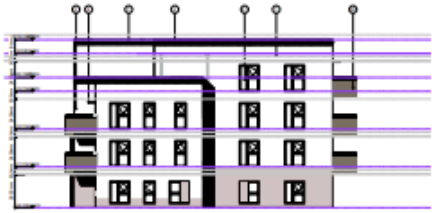
Plant

W2's entrance is recessed into the elevation and denoted as a glazed brick recess. The building has two recessed corner balconies to the west elevation to break up the scale of the building. The building steps in height on the west and south elevations which are the most sensitive elevations facing onto the new terraced houses and onto Fanshawe road.

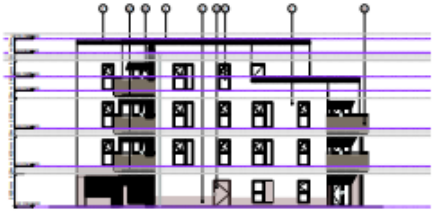


North Elevation

East Elevation



South Elevation



West Elevation

Design Proposal

4.5 Form and Scale : W3

W3 is a row of three terraced houses. The gable ends bookend the central house to provide visual interest and provide a front elevations to the east and south. The main body of the building is white brick with a red brick base. Red brick banding around entrances denotes the main entrance and adds interest to the elevation. Window and door frames are in a matching red.

Bin stores are in a matching red brick to the front of the houses and provide space for covered cycle parking and a green bin. They also provide a location for the EV charging points on the side of the garden store.

Design Proposal

4.6 Materiality - Apartments

1:
Parapet Detail.

2:
Balcony railings panel Detail.

3:
Pale white brick with off-white mortar joints.

4:
Dark brown bricks with white mortar joints.

5:
Champagne metalwork and vent panels

6:
Example of protruding brick banding entrance areas.

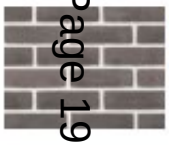
Design Proposal

4.6 Materiality - Houses

1:
Grey roof tiles

2:
Example of protruding brick banding entrance areas.

3:
Pale white brick with off-white mortar joints.



4:
Dark brown bricks with white mortar joints.

Design Proposal

4.6 Materiality - Windows and Balconies

2. Champaigne coloured Windows within darker brick areas & Balcony Metalwork

1. Brown/ black Window frames

Windows and doors are darlk brown/ black. Rainwater goods and parapet trims will be a matching light grey.

Balconies are steelwork structures with metal handrails. Only corner balconies will have circular posts. Circular posts will be same colour as the balconies. Balustrades are metal balustrades with solid panels having a metal powder coat finish panel. This retains a sense of enclosure when one is seated on the balcony.

We propose a sample selection of the colours for windows and rainwater goods.

Technical Detail

6.1 Accessibility M4(3)

All homes in the proposal are designed to meet Building Regulations AD M4(2) Accessible and Adaptable dwelling standard, which means all homes are accessible to any visitors using wheelchairs.

Four of the homes are designed to meet Building Regulations AD M4(3) Wheelchair use dwelling standard. This means that anyone using a wheelchair is able to live in these flats.

The drawings on the right show how the design of a wheelchair occupied 1B2P flat and a 2B4P flat would meet the M4(3) AD standards such as:

- Minimum corridor widths with minimum clear opening width of doors, including 300mm nibs to leading edges and 200mm to the following edge.

- Clear access zones in each room with furniture as required within AD M4(3) Appendix D.

- Bathroom size and layout designed as example set within AD M4(3).

- Wheelchair storage in the hallway.

- Wheelchair accessible bathroom and second WC.

- Storage sizes as per M4(3) Standards and space standards

- Minimum combined floor area for living dining and kitchen space

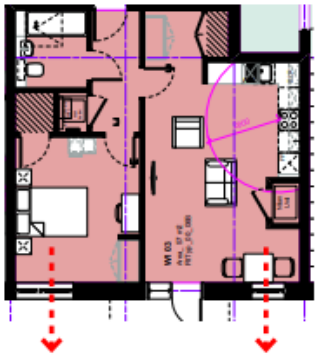
Technical Detail

6.2 Apartment Aspects

Right is a schedule of the homes on site and a definition of whether they are a single , dual , enhanced dual aspect or triple aspect homes. A dual aspect home is a home that provides openings on two external wall faces. An enhanced dual aspect definition is a home that provides openings on two external wall faces which are opposite each other/ provides through ventilation of spaces.

Overall the scheme has just 13 single aspect homes with 85% of the scheme being dual aspect or better.

Note plans are not to scale.



Example of a Single Aspect Apt.

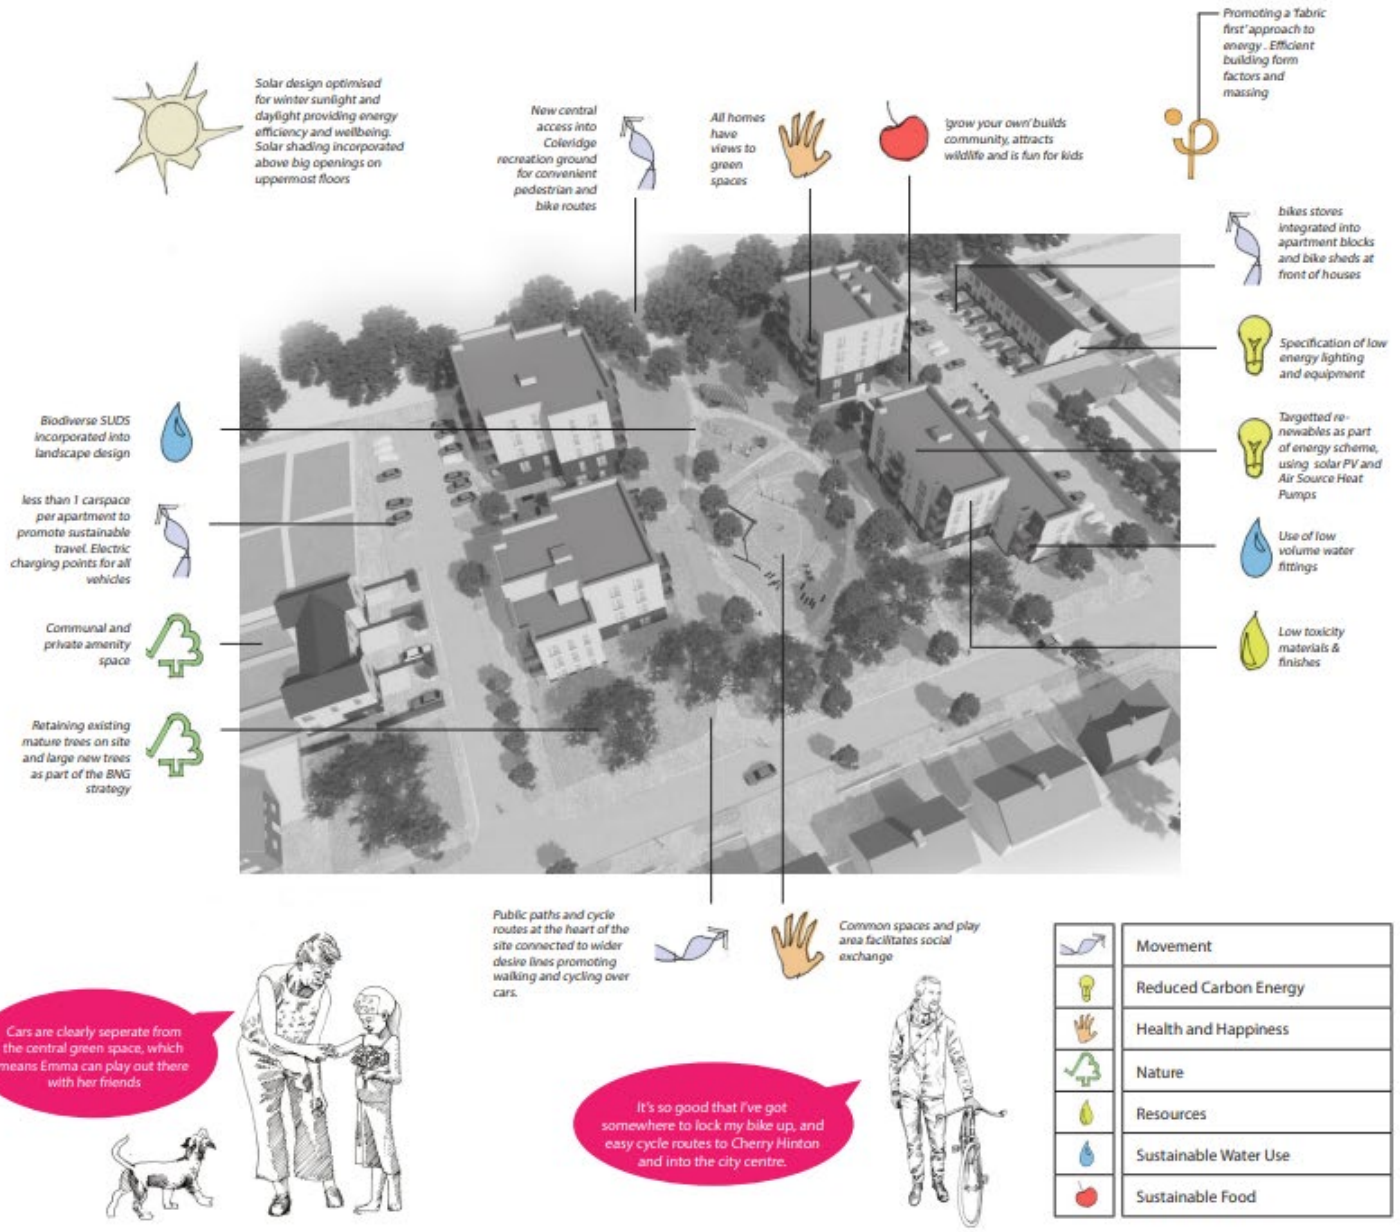
Technical Detail

6.3 Sustainability

The proposed development encourages residents to lead more sustainable lives and has also integrated measures designed to reduce energy demand. Targets from the Cambridge Sustainable Housing Design Guide 2021 have informed the sustainable approach for the scheme.

- Affordable homes designed using PassivHaus principles.
- Fabric first approach to the scheme. Affordable homes heated by compact units and air source heat pumps.
- No natural gas supply, fully electric scheme.
- Ventilation strategy provides secure ventilation through louvered windows at ground level.
- Solar shading to top floor openings & balcony overhangs provide shading to glazed doors.
- Green roofs on apartment buildings will assist with rainwater attenuation and the biodiversity.
- Cycle parking has been given priority over car parking.
- Underground bins provided which require less pick-uos reducing the carbon footprint.
- Less than 1 car space per apartment to promote sustainable travel. Car parking bays located away from the centre of the site to promote bike and pedestrian travel. All carspaces have EV charging.
- Lower water consumption targeting 99 litres per person per day.
- A SUDS strategy has been integrated into the landscape design.
- Medium and mature tree types have been selected to provide varied trees to the new green space. Site layout aims to maximise existing tree retention.
- Food growing areas will be provided to new residents in raised beds and an area of wildlife planting will be integrated into the landscape design.
- Targeting +20% biodiversity net gain on the site.
- Durable, attractive external materials have been specified to ensure the buildings age gracefully with minimal maintenance requirement.



6.5 Private Amenity Space

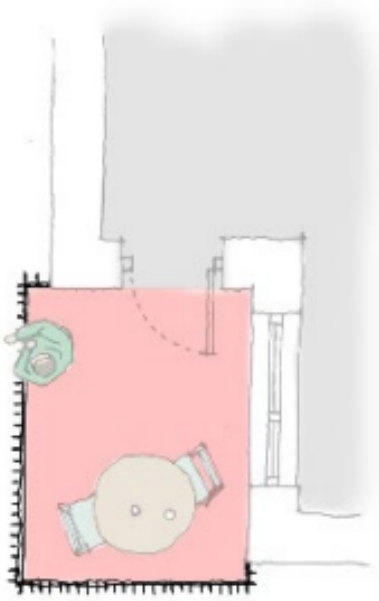
Apartment balcony sizes meet the following areas :
1bed 2 person apartments - 5m2 balcony
2bed 4 person apartments - 7m2 balcony
3bed 5 person apartments - 8m2 balcony

These provides amenity space for dining table and or seating on balconies.

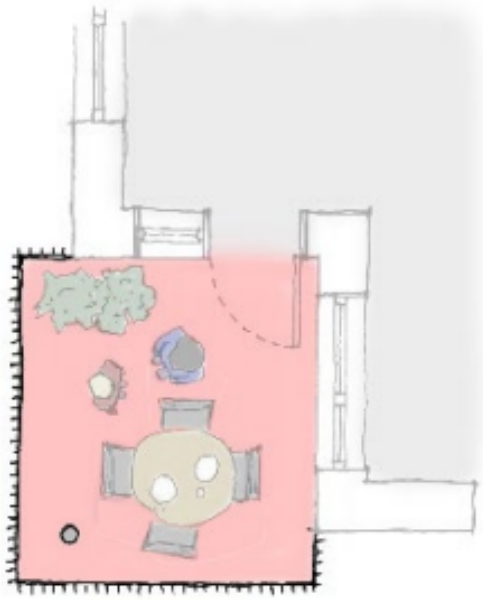
Ground floor apartment gardens are appropriately sized for the number of occupants in apartments. Refer to the landscape design plan for reference.

House amenity spaces
Each house has external amenity space to the front and rear of the house. Each front garden is provided with a tree and storage. Each house also has one on plot car parking space with ev charge point for the vehicle.

Rear gardens length are typically 8 metres long on E3 and 18metres long for W3 plus lane access to the rear of the gardens.



Example of 5m2 Balcony



Example of 8m2 Balcony
