

ENVIRONMENT SCRUTINY COMMITTEE 17/10/14

ADDENDUM TO AGENDA ITEM

PROPOSED SINGLE SHARED WASTE SERVICE

OBSERVATIONS

Paragraph 6.6 states that members will be updated at the meeting on any additional points that staff have raised as a consequence of the Informal Information Paper set out in Appendix 2 of the report.

The following additional points have been made by the Waste Strategy Team of the City Council and the proposed response is set out as feedback:

Comment	Directors' Feedback
It will be more advantageous for the Waste Strategy team to be located within the city than for the two teams to be co-located. There are a number of reasons for this including the interaction with other teams such as street scene, city rangers and the stores.	Paragraph 6.2 of the report makes it clear that the location of policy staff has yet to be decided however it is anticipated that these officers will be co-located. The reason for proposed co-location is to achieve efficiencies in policy formulation and to ensure that only one manager is needed for the policy function.

Simon Payne, Director of Environment, Cambridge City Council
