

Agenda item 7: Cambridge Together – Paul Boucher (Transformation Programme Manager)

This report to the Equalities Panel sets out the outcomes of the Resident and Community engagement during February and March 2023 as part of the Cambridge Together project, with a particular focus on the following:

1. Highlight the feedback around things that matter to various communities
2. How the engagement approach has helped/not helped to increase the participation of seldom heard communities and the lessons we have learned

Panel members will be invited to share thoughts on key findings, including what might be surprising and anything that might be missing given their knowledge of communities with different protected characteristics

They shall also be asked for feedback on how the Council can improve its engagement with people with different protected characteristics whose views were underrepresented in the project.
