

# ADVICEHUB TOUCH SCREEN KIOSK

Produced 3<sup>rd</sup> October 2011

## Introduction:

Advicehub will continue to develop and strengthen a partnership of advice and support services across the county by creating an infrastructure to coordinate activities, share resources and monitor quality of service.

One of the main objectives of Advicehub is to make advice available to everyone in Cambridgeshire who needs it. Advicehub has designed locally focused self-help websites, which has details and frequently asked questions so that clients can access advice and information quickly. Advicehub will continue to engage local advice organisations, commercial organisations, voluntary organisations and statutory bodies and include their details on the kiosk site. The kiosk will:

- 1) Be an easily accessible information and advice point
- 2) Reduce travelling costs – not all clients will have to travel to city/town centres to see an adviser
- 3) Provide information on local organisations and advice specialists. Right door first time.
- 4) Provide printing facilities to print information requested (where available/requested)
- 5) Provide Advice in different languages – to provide help and support to migrant population
- 6) Provide statistics with regards to which issues the clients are requesting help on (e.g. housing, debt, employment, benefits etc.)
- 7) Develop partnership working between all Advice and support organisations in the County.

These kiosks are just one strand of the Advicehub initiative and we are currently testing advice delivery using especially designed desk-top kiosks which allows advice services to be delivered remotely. This technology will use skype/video conferencing, IP Phones, document scanners and webcams. This will benefit advice delivery organisations as well as the client and will enable advice to be delivered quickly.

## Monitoring Kiosk usage across Cambridgeshire:

Of the 16 kiosks we have currently installed and in use (including 2 desk-tops), 9 of these have been earmarked for Cambridge City, generously funded by Cambridge City Council. We will continue to liaise with Cambridge City Area Committees to identify suitable locations.

Advicehub uses Siteremote software to collect statistics on the usage of each kiosk. Below is a summary of the usage from all kiosks in Cambridge City (a further 4 waiting to be installed). The kiosk at Mandela House went live on Friday 23<sup>rd</sup> September. For further information please contact Kulbir Singh (Advicehub Partnership Development Manager) on kulbir@advicehub.org or Tel: 01223 222765.

*The table below provides number of visitors along with the number of pages visited for each month at each kiosk.*
