Existing and Proposed Views – Hobsons Passage

Planning Balance

Approval

Key material considerations:

- Provision of office/R&D uses within a sustainable location
- Economic benefits such as promoting jobs through the construction and operation of the development
- Provision of community use in basement and ground floor
- Improvements along Hobsons Passage and Hobson Street by enhancing user experience and providing a form of vibrancy at street level
- Delivering a sustainable form of development
- Delivering a BNG on site

Refusal

Key material considerations:

- Significant level of harm upon the Conservation Area due to loss of existing buildings and historical context
- Total loss of the former cinema building which is a positive building contributing to the significance of the Conservation Area and provides a unique focal point along Hobson Street
- Significant harm upon the settings of heritage assets within close proximity to the site
- Inappropriate design and scale – interrupts the skyline of Cambridge and is out of context with local area
- Insufficient drainage information

Officer Recommendation: Refuse

Landscaping Plan

Raised Boardwalk Elevation - 'No Dig' Construction

Notes

1. Driveway - Permeable bound driveway surface (Block Paving or Resin Bound Gravel)
2. Entrance - Sliding gate entrance (5m opening) with brick pillars.
3. Boundary fencing and hedging - Boundary fence proposed along North boundary would be metal estate railings (1.2m high) or similar
4. Boundary fencing and hedging - Fencing proposed (timber 1.8m) along the East boundary (Trumpington Road) set behind hedge.
5. Tree swing - Childs swing from existing mature tree.
6. Fencing - Linked to the metal railings boundary fence (1.2m high) with a gate to keep garden secure for children.
7. Trees - New woodland trees (4 proposed)
8. Woodland Walk - Raised timber boardwalk would be installed using a 'no dig' approach with pedestal feet supporting a timber frame. This approach would spread any loading evenly across the ground and require only minor groundworks to clear and level the area. Please see design detail image for further info.
9. 'Tree Fort' - Children's raised platform adopting a 'no dig' construction method around the existing Chestnut tree with safety railing around the perimeter. A cedar shingle roof or similar could be installed to give protection from the weather. The platform is in view from the rear terrace and house for safety.
10. Hedge (evergreen) - To help screen Trumpington Road especially in Winter when trees have dropped their leaves.
11. Arches - Defining the entrance into the woodland (3 arches total).
12. Sunken Trampoline - Positioned Outside the root protection area of surrounding trees, Trampoline size shown: 14 x 10ft.
13. Play Area - Safety surface such as Play Bark Mulch would be used or a wet pour play surface.
14. Storage Building - Brick built storage building for garden equipment, toys and garden furniture.
15. Staggered Hedge - Evergreen hedge at two heights (1.8m and 1.5m)
16. Focal Point - Water feature with brick built wall.
17. Tree Avenue - Small garden trees (4-6m mature height) to help screen the garden and define lawn area.
18. Lawn Edging - Stone paving to define the lawn and providing a robust lawn edging.
19. Lounge / Seating Area - Pergola structure to give shelter and shade from the sun. Structure shown at 6m x 3.6m. The ground level in this area would be 300m lower than the main terrace.
20. Steps - Large steps leading to the lawn and down to the outdoor lounge area.
21. Raised Planter - Brick built raised planting bed with specimen tree.
22. Water Feature - Shallow body of water (200m depth) surrounding the main terrace. Two water chutes will create sound and movement.
23. Stepping Stone - Single large stepping stone to cross the water.
24. Main Terrace - Dining terrace to seat up to people 12. Parasol will give shade; cantilever parasol could be used for greater shading.
25. Steps - Leading to the lower paving area / side path.
26. Side Path - Leading around the house and to the driveway. Please note there is a section of paving near to trees T001 & T004 which require a 'no dig' method for the paving construction using a product such as Cellweld TRP. This paving also forms the base for the Bike Store and Bin Store.
27. Bin Store - Enclosed bin store.
28. Bike Store - Enclosed bike store for 6 bikes.

1 Landscape Proposal
Scale: 1:200

Planning Balance

Approval

Key material considerations

- Siting and design of the proposed dwelling is acceptable in this context
- The proposed development is not considered to harm relevant heritage assets

Refusal

Key material considerations

Officer Recommendation: Approve subject to conditions

Existing and Proposed Visuals – Gilbert Road

Planning Balance

Approval

Key material considerations

The proposed development would make efficient use of a brownfield site, with a net gain of nine units, which is located in a highly sustainable location.

The scheme is considered acceptable in terms of its impact on character, neighbouring properties and in terms of future occupants amenity

Refusal

Key material considerations

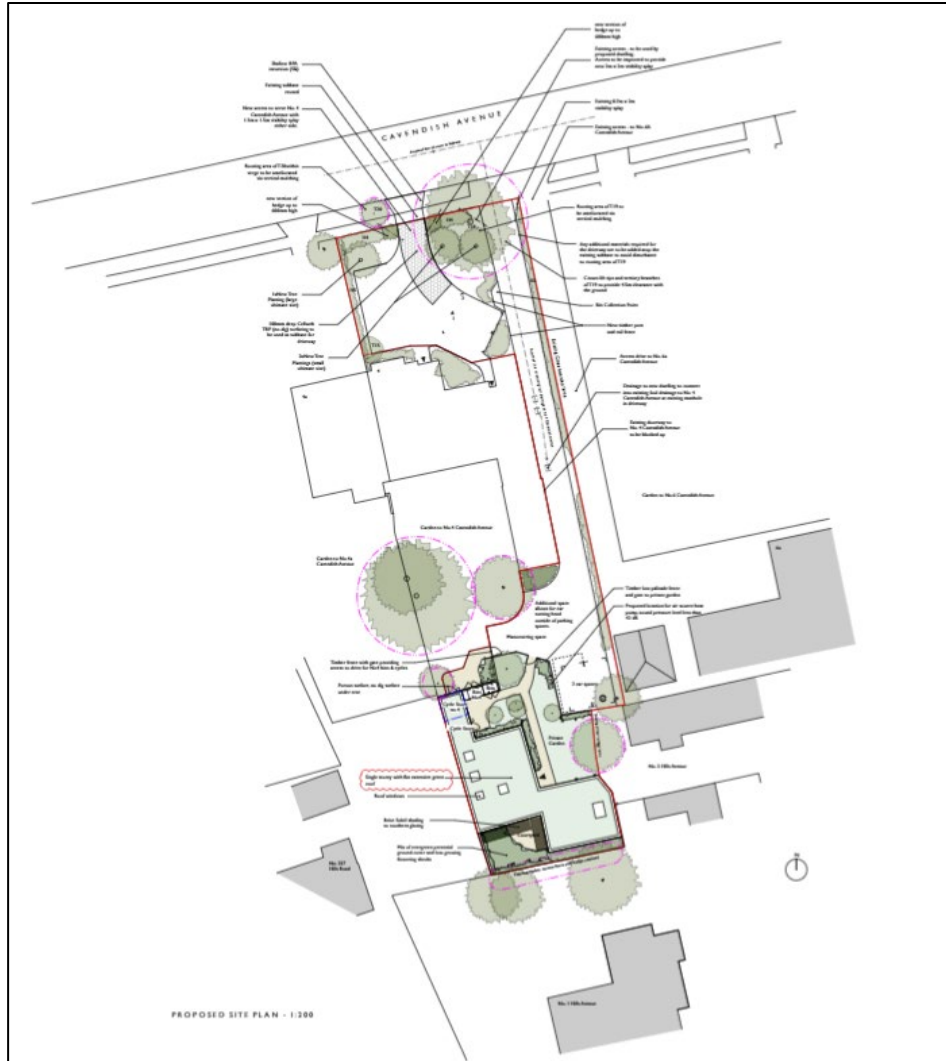

- Overdevelopment of the site
- Introduction of a commercial unit within a residential neighbourhood
- Loss of garden land

Officer Recommendation: Approve

NORTH EAST ELEVATION AS PROPOSED

Planning Balance

Approval

Key material considerations

- The predominant use would remain as a dwellinghouse (Use Class C3) and a small scale change of use could be achieved under permitted development fallback
- Conditions attached linking the unit to the residential unit and opening hours to protect future occupiers and neighbouring amenity

Refusal

Key material considerations

- Introduction of a commercial space into a predominantly residential area
- Additional movements to and from the property

Officer Recommendation: Approve

Proposed landscape plan

Planning Balance

Approval

- Improved relationship with existing neighbouring properties compared to extant reserved matters consent.
- High quality development in terms of urban design and landscaping,
- Meet sustainability targets for carbon reduction and water efficiency.
- Accessible homes compliant with Building Regulations requirement part M4(2).
- Mitigation measures secured by conditions to protect residential amenity, existing trees and hedges, and ecology during construction.

Refusal

No harms have been identified.

Officer Recommendation: Approve subject to conditions and Unilateral Undertaking

No. 27- GROUND FLOOR

PLOT 1- FIRST FLOOR

No. 27- FIRST FLOOR

Planning Balance

Approval

Key material considerations

- Proposed dwelling is in keeping with character of the terrace and will not have an adverse impact on character of surrounding area.
- Proposed single storey extension is a subservient addition and in keeping with character of dwelling.
- No significant impact on residential amenity of neighbours.
- Proposal accords with policy 82 with regards to parking provision. A car free development is supported in this location.

Refusal

Key material considerations
